vertical storage solutions

POOL & BOAT COVERS

BAR STOCK SHELVING CAROUSEL

- Maximize available storage by utilizing overhead space for long materials such as light-weight aluminum used in the swimming pool and boating industries.
- Vertical design allows product to be stored in-line with production process or used as product storage prior to assembly or installation.
- U-shaped carrier design with removable vertical bars allows for easy loading of bundled goods or for boxed pool kits such as tracks, rails, liners, walls, motors, and pool covers.
- Optional loading nose available – allowing one length of material or a box to be slid out the end of the carousel onto the cutting table, assembly station or delivery truck.
- Vertical bars on U-shaped carriers are removable, allowing a forklift to place a bundled load.

INDUSTRIAL ROLLED GOODS CAROUSEL

- Recover floor space by maximizing overhead space for storage of polypropylene or vinyl material for pools, acrylic material for boat covers or the many various material used for sail fabric.
- Accommodates all roll diameters.
- Ergonomic design increases workplace safety and reduces back injuries while integrating directly with a cutting line for a continuous material feed, minimizing product touch points and increasing production capacity.
- Fast access for improved productivity and production capacity.
- Patented, easy to use, loading system
- The Industrial Rolled Goods Carousel can be operated by a single person.

Safe Handling • Easy Access • Maximum Storage • Fast Retrieval • Small Footprint
